

CT30

Desiccant Cartridge Dryer

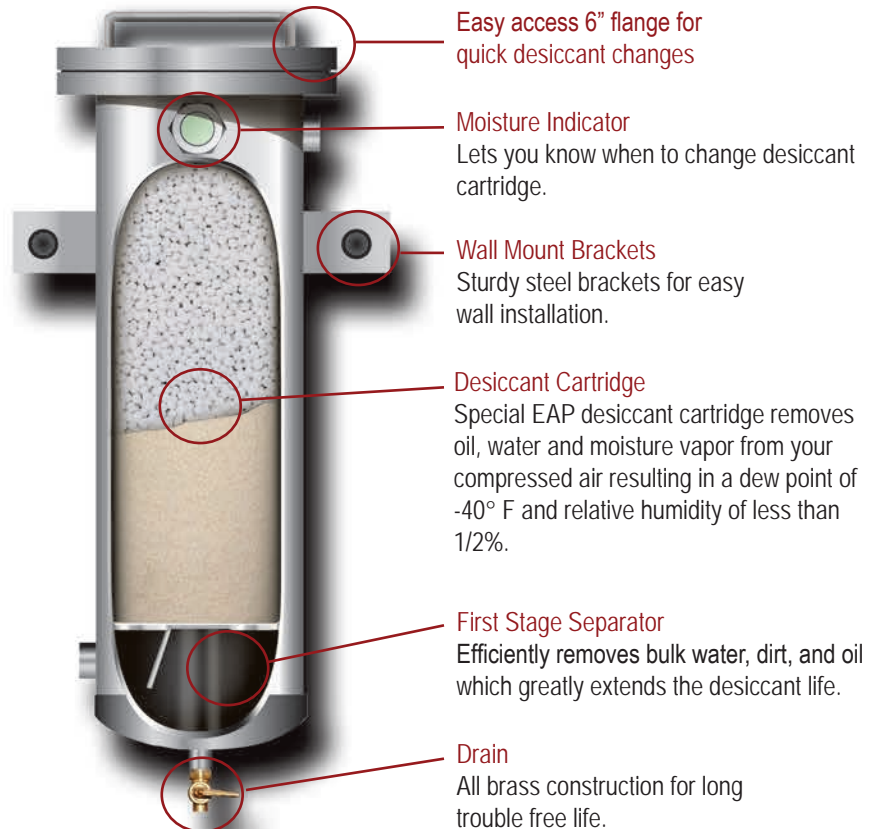

Complete Compressed Air Treatment Center

The CT30 desiccant air dryer can be used for any point of use application where you want protection from water, oil, and dirt. The CT30 has a capacity of 30 SCFM.

The built-in features (shown on the right) make Eastern Air Products CT30 the most effective, economical and easy to use product on the market today. The CT30 comes fully assembled, uses no electricity, and is easy to install in your existing compressed air line. Install it near the intended point of use application or tool.

Typical compressed air is saturated with 50% to 100% relative humidity. That means that the compressed air is carrying a lot of moisture vapor when it goes through your paint gun or point of use application. Filters and traps only take out liquid water that has already fallen out of the compressed air and does nothing to protect you against the 50% to 100% moisture vapor still remaining in the compressed air.

The CT30 desiccant air dryer removes moisture vapor down to 1/2% relative humidity or a -40° F dew point. This means NO moisture will condense into liquid water until the compressed air sees a temperature of 40° below zero.

The EAP CT30 desiccant air dryer is 100% satisfaction guaranteed. If for any reason you are not completely satisfied simply return it for a full refund.

www.easternairproducts.com

The EAP CT30 utilizes a convenient and easy to change desiccant cartridge. No struggling with loose spend desiccant beads. The 10lb. desiccant cartridge pulls up and out of the vessel in seconds to get you back to operation quickly. Each desiccant cartridge is precisely measured with 10 lbs. of EAP desiccant.

The patent pending EAP Desiccant cartridge is made out of special filter media which removes inlet oil aerosols and solids down to .001 micron eliminating the need for expensive maintenance items such as coalescer and final filter elements which saves you hundreds of dollars per year in maintenance costs versus any other dryer on the market today!

CT30

Desiccant Cartridge Dryer

CT30

The EAP CT30 is a wall mount air dryer. Heavy duty mounting brackets allow for a secure installation anywhere.

CT30-P

The EAP CT30-P is a portable compressed air dryer. All the same great features as the CT30 along with a convenient handle and legs so you can carry it to the point of use.
